

HOW TO INTERVIEW A DOCTOR

	Points
1. Are beef and eggs good foods?	
Both are bad because they contain saturated fat and cholesterol.	-10
Both are good foods.	+5
Organic free range eggs are excellent unless you are allergic to them. Organic grass fed beef is an excellent food.	+10
2. Should I get a flu shot?	
Of course.	-10
No. You have enough mercury already!	+10
3. My cholesterol is 200. Do I need a statin drug?	
Yes.	-10
No. Statin drugs are very harmful and reduce CoQ10 levels.	+10
4. Do you prescribe Armour Thyroid?	
No.	-10
Yes. Armour Thyroid is far superior to synthetics.	+10
5. Are CT scans safe?	
Yes.	-10
No. CT scans are a cause of cancer. We use MRIs and ultrasounds.	+10
6. Would the purple pill help my heartburn?	
Let's give it a try.	-10
Most cases of heartburn are caused by a lack of stomach acid.	+5
We should consider betaine HCl and we should correct your hiatal hernia.	+10
7. Should I take a B-complex 50?	
No. You can get your vitamins from food.	-10
Yes, it is good for treating stress.	-10
Probably not. High doses of synthetic B vitamins alter the chemistry and create a relative deficiency of the missing factors.	+10
8. What is the best treatment for a slight aortic aneurysm?	
Beta blockers.	-10
Let's do a red blood cell copper test.	+10
9. Are there effective natural treatments for cancer?	
No.	-10
Yes, there are several effective non-toxic programs	+10
10. Do you have a treatment for nanobacteria?	
A treatment for what?	-10
Yes. We use tetracycline and EDTA.	+5

Yes. There are herbal combinations that remove nanobacteria and the calcium deposits.

+10

A really good doctor will score close to 100. If you go to a doctor with a low or negative score, you may learn the hard way that medical care is now the leading cause of death in the USA. - R. Loyd
